# CHOM WHITEPAPER

## 1. Introduction

CHOM is a community-built memecoin on Solana, created to revive authentic meme culture and signal the arrival of the 2026 Solana meme supercycle. In past cycles, memecoins have acted as cultural accelerators for blockchain ecosystems. CHOM exists to prove that Solana is not a trend-driven chain, but durable infrastructure capable of repeatedly igniting global meme movements.

## 2. Background & Narrative

In 2022–2023, Solana was widely labelled a "dead chain." That narrative collapsed when BONK emerged and transformed Solana into the most active memecoin ecosystem in crypto. Today, history is repeating itself. Skeptics once again question Solana's relevance.

CHOM is built to show non-believers the fate of Solana — not through noise, but through conviction. The project resonates with builders, thinkers, and long-term believers such as Solana Sensei, Anatoly Yakovenko, Mert, and the broader Solana-native community who view Solana as infrastructure, not hype.

## 3. Vision

CHOM's vision is to re-establish memecoins as culture-first assets rather than short-lived speculation tools. The project aims to:

- Restore organic meme creation

- Encourage long-term community participation

- Anchor memecoins back to Solana-native infrastructure

- Represent the 2026 Solana meme supercycle

## 4. Philosophy

CHOM is guided by three core principles:

**Culture over Pumps**
No artificial hype cycles, no quick pump mechanics, and no extractive launch models.

**Solana-Native First**
CHOM is built using raw Solana infrastructure, respecting the ecosystem's original design ethos.

**Community Ownership**
CHOM is collectively shaped by its community, not controlled by insiders.

## 5. Token Utility

CHOM is a memecoin with cultural utility rather than financial promises. Utility includes:

- Meme identity and representation

- Community governance signaling (non-binding)

- Participation in CHOM ecosystem tools (meme maker, PFP maker)

- Cultural asset for the Solana meme economy

CHOM does **not** promise profits, dividends, or financial returns.

## 6. Tokenomics

**Total Supply:** 1,000,000,000 CHOM

- **Liquidity:** 70%

- **ICO:** 20%

- **Community Airdrop:** 8%

- **Team:** 2% (fully vested)

There is no hidden allocation or inflation mechanism.

## 7. Launch Strategy

CHOM avoids third-party launch shortcuts. Instead, it launches natively on:

- Raydium

- Meteora

- Orca

This approach mirrors early 2021 Solana launches and reinforces CHOM's infrastructure-first mindset.

## 8. Roadmap

**Phase 1 – Community Formation**
Building the CHOM Army, meme creation tools, and organic distribution.

**Phase 2 – Native Launch**
Liquidity deployment and listings on Raydium, Meteora, and Orca.

**Phase 3 – Cultural Expansion**
Growth of CHOM as a recognizable Solana-native meme across social platforms.

**Phase 4 – Meme Supercycle (2026)**
CHOM stands as a cultural symbol of Solana's next major meme era.

## 9. Team

CHOM is developed by a small, anonymous, Solana-native team focused on culture, art, and infrastructure alignment. Team allocation is minimal and vested to ensure long-term commitment.

## 10. Community

The CHOM community ("CHOM Army") is the project's core strength. All major momentum, creativity, and growth originate from community participation rather than centralized control.

## 11. Disclaimer

CHOM is a memecoin created purely for entertainment and cultural expression. It has no intrinsic value, no expectation of financial return, and no promise of profit. Cryptocurrency markets are highly volatile. Participate responsibly and at your own risk.
